on this subject. It is certain, that many abolitionists of the north have discarded the Bible, because they could find in it nothing to sustain their wild extravagance on the subject of slavery. Besides, the Bible is in every body's hands,

KENTUCKY STATE CONVENTION.

OFFICIAL REPORTS.

MR. R. SUTTON. CHIEF REPORTER. WEDNESDAY, DECEMBER 12, 1849.

[Proceedings Continued.]

Mr. WALLER. Laboring under serious indisposition, nothing, sir, but a deep sense of duty to my constituents and myself could induce me to could he have said, in the only document he evmy constituents and myself could induce me to encounter the manifest impatience of the convention to hear any more speeches upon this subject. My constituents are content to abide by the old provisions of the constitution with an additional clause providing that no slave shall be emancipated to remain in the state. They have as deep an interest in this matter as any county in the commonwealth; and they are satisfied with the protection which their slave property has hitherto received. This is all they ask—it is all that is necessary.

But I am actuated by a personal reason for asking your attention. My position is more peculiar than that of any delegate here. Some have expressed a surprise that one of my profession should entertain the sentiments I do on this, emphatically the great question of the age. That the reasons for the votes I have given and which I may give on this subject may appear, I now. Yer liddly held and a moral wrong? the reasons for the votes I have given and which I may give on this subject may appear, I now, under all the disadvantages which surround me, arise to speak. I trust, then, my offence, if it is so esteemed, in trespassing upon time which I know to be precious, will be considered in clearity and forgiven I do not speak because I love to speak. I would rather hear the voice of the votes of the drunkard, the liar, the swearer, the debauchee, and all that were universely were resolved. any gentleman here than my own. My conduct righteous were excluded; and yet into it were heretofore is my witness to justify this statement, admitted the slaveholder and his slaves. In

heretofore is my withess to justify this statement.

I am not prepared, sir, to go the full lengths which the language of some gentlemen would seem to imply. Indeed I feel confident they have not themselves critically considered the full force of their expressions. I cannot persuade myself that when gentlemen call slavery a blessing, that they intend to convey the imbersion, the control of the a blessing, that they intend to convey the impression that they consider it a blessing in the abstract—a blessing per se. If this were true, the necessary deduction would be, that freedom was a curse:—that the condition of all men would be better in a state of menial servitude! For it must be manifest to every mind, that if slavery is a blessing per se, that its opposite, freedom, must be a curse. And if we confine this remark exclusively to the negro race—if it be a blessing in the abstract to them, then every dictate of religion and philanthropy would urge us to use all possible means for the enslavement of the entire black population of the earth! A position so monstrous, I am persuaded, no memitide in a sin from which we night so easily position so monstrous, I am persuaded, no member of this convention is prepared to assert, much disburden ourselves! If it be a sin, it is one we

less maintain.

But while I do not believe that slavery in the abstract is a blessing, I do affirm that slavery in the south, and in Kentucky especially, has been a great blessing to the negro—that the negroes now in slavery in the United States are in far better equiliting—more clavated in the reals of can and be conscience is oppressed by it, he better equiliting—more clavated in the reals of can and be conscience is oppressed by it, he better condition—more elevated in the scale of can and he ought to relieve himself of the burintellectual and moral being—than the same den under which he groans. He should not number of negroes, to be found any where upon think to excuse himself earth, or that ever had a habitation or home in any other clime or country, in this or any other fesses to be. Besides, he must give an account age. And if wrong has been done to the negro for himself, and not for another.

Yes, sir, I repeat it: the abused and slandered upon them. Much of the wealth of New England was obtained in the negro trade. This south have been the great benefactors of the ne-gro race. But scarcely had a stop been put to the importation of slaves to this country—scarcely had the last New England slaver disgorged its contents on the shores of the south, ere New England moralists began to discourse most sagely about the enormities of southern slavery. I did not say of the comforts of life—more hospitable, genethat slavery was a moral and a social wrong: rous and brave—more virtuous and intelligent, but a social and a political evil.

Mr. WALLER. I stand corrected; and am most happy to be thus corrected. At all events, the eloquent gentleman from Knox (Mr. Woodson,) quoted—I do not know that he endorsed son, quoted—I do not know that he endorsed—some Doctor of Divinity who maintained that slavery was contrary to the teachings of Holy Writ, and was a sinful relation. I do not intend, and in this perhaps I shall disappoint the

expectations of some, to enter into any elaborate argument in relation to the Bible doctrine

tion between the slavery originating in the curse of Noah, just this side of the flood, and the

slavery existing in this country. Nor do I feel it at all necessary that I should do so. I meet the charge that the relation between master and

slave is a sinful relation, on broader grounds.

Taking the Bible as a standard of morals, and

I affirm it inculeates no such sentiment. It tells us that many of the holy men of old were slave-holders; and it does not intimate that their being so involved them in peculiar guilt. Abraham, the father of the faithful and the friend of

God, was a larger slaveholder, by far, than any

pauperism and erime. In several of the tree states, pauperism is increasing in a ratio appallingly in advance of that of population. But sir, what sort of population does always keep out of Kentucky? Why, I suppose the abolitionists, who are so superlatively pure that they fear contamination if brought in contact with the slaveholder. And perhaps, too, we are deprived of those hordes of European paupers, vagabonds, and criminals, who constitute so large a portion of the boasted population of the free states. If so, I am content. I prefer that Kentucky soil should be owned by Kentucky's sons. At least, I am content with the character of the population which we now have. We have been tood that in almost every thing the north is superior to the south. Sir, I love and honor the north. I envy not her greatness. I would detract nothing from the excellency of her institutions. The men of the north are our brethren—our fellow-countrymen; and we should all rejoice in the prosperity of any portion of the south. I need not now pause to point these out, and to present them in contrast. It is enough for all present purposes that we attempt to show from the history of our country, that the south is not that insignificant and unimportant portion of this confederacy, which northern fanaties and their sympathisers have asserted. What part of this country has contributed more than the south, to fashion and form this great republic, and to elevate her to that exalted eminence which she now wards it. They would lay burden upon your vate her to that exalted eminence which she now occupies? The cloquent statesman who moved, shoulders, and would not touch with the tips of and he who penned the Declaration of Independence, were southern men and slaveholders. The commander-in-chief of the armies of the revolution—"first in war, first in peace, and first in the hearts of his countrymen,"—was a southern man and a slaveholder. All the great president was no love of this movement in K dents, those whom the people delighted to honor, were southern men and slaveholders. For fifty years, the reins of government of this great na-tion have been held by southern men and slavetion have been held by southern men and slave-holders. Only twelve years were they held by the benefit of the few at the expense of the manorthern men, and in every instance the people snatched them from their hands at the first opportunity. The mostillustrious generals of the last war with Great Britain, as well as of the war with Mexico, were men born and nurtured in the south. No man aequainted with our history has a south. No man aequainted with our history has a south. So man aequainted with our history has a south a south of the south. So man aequainted with our history has domains—surround himself with a dependent of the response of the many new at the expense of the many. The rich champion of emancipation would convert his slaves into eash. The operations of the system would for a time at least, so it was granted, reduce the value of land. He would vest the price of his negroes in land—enlarge his domains—surround himself with a dependent of the convert his slaves into eash. The operations of the convert his slaves into eash. The operations of the convert his slaves into eash. The operations of the convert his slaves into eash. The operations of the convert his slaves into each. No man acquarated with our history, but must be constrained to confess that the slave states, more than any other states, have contributed to render our country great at home, and illustrious abroad, both upon the battle-field and in the halls of legislation—that southern men have done most to make us the great and the renowned nation that we are. In what, then, consists that southern inferiority, of which so eonsists that southern inferiority, of which so much has been said? Sir, the history of our country teaches no such inferiority. It has no foundation in truth—it is but the vision of a

unison with any other sentiment. Even granting slavery to be an evil to the extent contended for by certain delegates, it is an evil into which the citizen has been involved by the action of the state. And I hold it to be a correct political maxim, that the state has no United States. They may read to him the Dec right to remove an evil of her own creation, at the expense and to the injury of individual citizens. Inasmuch then, as by express grant of law, private property to the amount of more than \$60,000,000 has been suffered to vest in slaves, it would be unjust it would be iniquitous to deprive these actions of the surface of the whites tous to deprive those citizens of that property, He cannot eat at the same table, or ride in the without their consent or without compensation. same coach with them. True, we have not increased in population so fast as our neighbors. Many of our citizens have emigrated to other states; but it was not slavery that drove them away. This my friend from Jefferson (Mr. Meriwether) has incontestibly shown. Kentucky is now the mother of states, but her children did not leave her because they abhorred this "peeuliar institution." For if so, why did they not go to the states where it did not exist? Why did nine-tenths of them go to slave states? This neets and refutes the charge that slavery has driven many from our borders.

But population and prosperity are not always synonymous terms. If some of our neighbors are ontstripping us in population, so they are in pauperism and erime. In several of the free states, pauperism is increasing in a ratio appallingly in advance of that of population. It is important that Kentucky should not be distracted and divided now upon the slave question. It is important that our state should stand firm upon her old platform. The slavery question is now shaking our national government to its foundation. Hitherto Kentucky has acted as a mediator between the contending parties of the north and the south. Her voice has more than once been putent in staying the agitation of the waters of potent in staying the agitation of the waters of strife, discord and dismnion. If she would maintain her position as peace maker, she must stand firm where she has ever stood in relation to this question-avoiding alike northern and southern

We are particularly interested in maintaining the integrity of our national government, as handed to us by our fathers. Let us unite our voices with that of the hero of New Orleans, in vindication of the sentiment: "the Union-it must be preserved." The states of this, no longer western, but central valley, are united to-gether by the indissoluble bonds of nature. The "father of waters" flowing through its midst, stretches his arms from the Rocky mountains to the Alleghennies, and encircles in our fond embrace all the states of this great valley Our disseverance then cannot be accomplished without political suicide. The slave question and no other question can separate the western states. It seems then a sacred duty of ours not to let this question divide other states.

All the recollections of our history ought to endear this Union to every American heart. Look at the declaration of our independence; and to that document are signed promiseuously the names of northern and southern men. Go to the battle fields of the revolution, and in the same grave mingles the dust of northern men with the dust of sonthern men, and there let them rest in quietnde until aroused at the resurrection. The same historic page which records the deeds of Washington, Sumpter and Marion, of the south, in the war of the revolution, also records those of Putnam, Warren and Greene, their illustrious compatriots of the north. Let him who would destroy this confederacy first obliterate the evidences of the union which existed among those who gave us our liberties and founded this government. Let him tear the deelaration of independence so as to separate its northern from its southern signers. Let him violate the graves of the illustrious dead, and permit no longer the soldiers who died for our liberties to sleep in the same grave. Let him read the page of history on which are the recorded deeds of Warren and Washington-of northern and southern heroes-so that the one shall not stand connected with the other; and then let him de-molish the work of their hands! wealth and prosperity, and never yet did I feel the least disposed to shrink from the declaration, that I was a Kentuckian. Kentucky is no mean state in the estimation of her neighbors. The ehivalry of her heroes and the eloquence of her statesmen have carried her fame to the utmost bounds of civilization. There is nothing in her present condition, nothing, I am sure, in her past history, which should make her sons ashamed to call her mother. I would not disturb her social relations. I want her still to remain the land of hospitality, and of noble and generous impulses. In behalf of my constituents then, I beseech you let this institution stand wholly undisturbed, without any change.

I should not at this time de tain the convention with any remarks, were it not that the gentleman last up, (Mr. Waller, and others who have recently spoken, gentle men who claim to be pro-slavery men, say-and they look over in this direction when they do say it-that upon the subject of slavery they cannot go so far as some other gentlemen go, but that they are still pro-slavery men, and profess to argue for the perpetuation of the institution in the state of Kentucky,

I will not, sir, after so much has been said upon the subject of slavery, and at a time when the opinion of every gentleman has become a "fixed fact," detain this convention with an argument to prove that the institution of slavery, as it exists in Kentucky and in every slave state in the union, is a blessing to both races. The question was taken on the adoption of te section, and it was rejected.

Mr. C. A. WICKLIFFE offered the following,

supply the place of the section just stricken

The general assembly shall have power to pass laws to punish free negroes, for crime or misdemeanors, in such mode as is now prescribed by law. Or, may substitute as punishment for crime or misdemeanors, banishment and transportation out of the state, or a sale into involuntary servitude."
Mr. HARDIN. There is a difficulty in this,

Mr. Fresident, which I do not see how we can overcome. How can we send these negroes out of the state? We have no jurisdiction in this matter. We know that if a man commits murder in Vivinia. matter. We know that if a man commits mur-der in Virginia or Tennessee, by a requsition from the governor of either of these states upon the governor of Kentucky, the criminal would have to be surrendered; but I do not see that we

have to be surrendered; but I do not see that we have any power to banish a man, and if we had we have no place to which to send him.

Mr. C. A. WICKLIFFE. I should suppose Mr. President, that although we have not exercised the same power which some of the states of this Union have by the purchase of, and the maintaining a colony upon the coasts of Africa, it is not because we do not possess that power, but because no emergency has hitherto arisen rendering it expedient that such a power should be exercised by Kentucky. It may have been thought by some, that under the existing constitution of the state, this power is not vested in the legislative department. We know that Maryland, as a sovereign state of this Union has land, as a sovereign state of this Union has owned and governed a colony upon the coast of Africa, which for a series of years, was called the "Maryland colony." I am not prepared to say, and I will not go into a discussion on the point at this moment, that the state of Kentucky cannot in his moment, that the state of Kentucky cannot in his moment, that the state of Kentucky cannot be seen that the state of the state molish the work of their hands! Who would have torn asunder the "star spangled banner" which has waved so long over "the land of the free and the home of the brave?" No sir, that proud eagle, the emblem of our country's union and liberty, which has soared high and so gloriously, the wonder and admiration of the world, is ever to be struck down, God forbid, that a Kentuckian's arm should wing the shaft which is to arrest the noble bird in his etherial flight.

I beseech gontlemen to yield their preferences on the low of '22 and its experiences' that we would be a structure of the control of the foreign government. There is no inhibition in the nature and structure and structure of the world with the worl is ever to be struck down, God forbid, that a Kentuckian's arm should wing the shaft which is to arrest the noble bird in his etherial flight. I beseech gentlemen to yield their preferences on the law of '33 and its opposite; that we may, as in times past, speak peace to the troubled elements of the country. Let us say to the north, we occupy now on this subject, the ground which we did when our fathers on the battle field fought and bled for northern rights; and let us make the same appeal to the south, and it let us make the same appeal to the south, and it the total and the following the same appeal to the south, and it may be, our voice will be heard. For one, I am content that this subject shall remain as it has ever been in the organic haw of our state. Let who else may, I am not ashamed of my state, who else may, I am not ashamed of my state, and the same appeal to the south, and it would be seen to adopt some means of transporting beyond the jurisdiction of this commonwealth, a free negro convicted of crime. I want to leave the field open to future legislature action upon this subject. If the legislature does foundation in truth—it is but the vision of a dream.

I do not profess to be blessed with a Seer's vision. I cannot tell, therefore, by what inspiration gentlemen speak, who so oracularly profess to the certain downfall of slavery. I suspect, how ever, that the "wish is father to the thought"—that they are but giving utterance to the warm desires of their hearts. But I am wholly unmoved by those spectres of danger so terrible in the eyes of some. Kentnekians never take countable than to tell them.

Is not the two and the stranger of their hearts. But I am wholly unmoved by those spectres of danger so terrible in the eyes of some. Kentnekians never take countable that they are but giving utterance to the warm desires of their hearts. But I am wholly unmoved by those spectres of danger so terrible in the eyes of some. Kentnekians never take countable them to tell them.

Twice I have stood upon other soil than to the strapes of the stars and the stripes of the stars and the stripes of the imit of their power—such as have heretogened to the limit of their power—such as have heretogened to the stranger, feeling prouder than ever, that I was an American. I have been in nearly all them to tell them, the eyes of some. Kentnekians never take countable the proposition of the population of Kentucky—free negroes—and the stripes of their grant of the propulation of the pr not to invade those rights, or to treat them with cruelty. But if, when the evil of crime has grown so intolerable as to render it necessary for us to take some steps towards effecting are medy: if, under these circumstances, we cannot exercise the power of banishment as a punishment, let us at least give to the law-making power the choice of determining whether this class, when guilty of crime, shall, upon the second, third or fourth conviction, either be punished by banishment or sale into involuntary servitude, or er by imprisonment in the penetentiary for life. Confinement in the penetentiary, of a free negro, presents but little terror to a dishonest free negro; and we all know, that with him at least, it is not considered any degradation of character. Let it be understood that if a free negro should be convicted of any crime he will be liable to be banished to some other country, beyond the United States. Let that be understood as the law of Kentucky, and instead of being annoyed with free negroes coming into the state, they will be very apt to keep away, and all the vicious ones we may now have, will leave the state as tast as they can. That is my amendment. I leave it with the convention to adopt or reject

it as it may deem best.

Mr. A. K. MARSHALL. I move to amend the amendment, by striking out the words "banishment and transportation out of the state.'

The objection urged against this proposition by the gentleman from Nelson, (Mr. Hardin,) that Kentucky has no power to banish her fel-ous to another state, is met by the mover of the section with the suggestion that Kentucky might establish a colony upon the coast of Africa, or use some of those already in existence as a place of banishment; and seems to indicate that the colony of Liberia would be a fit receptacle and an appropriate place of punishment for the ne-gro felons of Kentucky.

The colony of Liberia, sir, was established by the philanthropist and the christian to afford to the free blacks of the United States an asylum from that state of degradation, inevitable, so long as they remain in this country, and to furnish a home in the land of their fathers where, while we are relieved from the course of their presence among us, they can enjoy the blessings of civil and religious liberty. It would not be possible to induce the free blacks to go to that country—a thing, in my opinion, much to be desired, and that which would be of infinite advantage to both white and black, to bond and free—if we convert it into a place of punishment instead of a place of refuge, a country, and a

The christian looks to this colony as tending to the fulfillment of that promise, "that I will give thee the heathen for an inheritance and the ttermost parts of the earth for a pos-And it is true, that to shed the light of religion and civilization upon the dark sons of Africa, has been the most difficult task of the christian minister. They have ever known the white man as the enemies of their race, and cannot, and will not, receive them as ministers of mercy. From those of their own color who even in their degraded condition—the condition of slaves have been elevated in intellect and morals far, very far, above them, they must receive their first lessons in civilization and christianity.

And when we see the sons of the desert, cannibals, whose fathers were forced from their home —if home it could be called—returning to their father land, fitted by their masters for the work, carrying the "glad tidings" to their benighted breihreu, well may we exclaim, "just and true content myself by refering the gentleman from are all thy ways thou King of saints.

have a tendency to defeat the objects for which this colony was instituted; and it cannot be ques i med, that to sen! the worst of our black eriminals—to force these upon the colony, would subvert the great culs of its institution; and I desire to see the free blacks remove from this country; I wish them to be willing to go; and I cannot say to them in our laws, that the home to which we invite them is worse than a penitentiary. Sir, it is not so. I look upon these colonies as the only bright spots on that benight of coast—thases, from which the streams moral and intellectual may flow, to make the desert bloom and blossom as the rose"-a home for the black man in that climate congenial to his nature, where alone he can enjoy those so-cial, civil, and religious blessings, which here he has loved and wishes for, though not fully enjoved. I cannot cast a shade, a suspicion up non these colonies, by pointing to them in our laws as fit only for criminal stations.

pe that the gentleman from Nelson, who is both a state-man and a christian, will agree to strike out of the section the words I have pro-

posed to strike out.
Mr. HARDIN. I want to strike out those words because I do not think we have the power to expel a free negro from this state. The free negro, sir, has a vested right to his freedom, and a vested right to his residence here. You may pass laws prohibiting a man from setting the slaves he may now own, or their increase, free you may pass laws providing that if he does, that they shall not remain in Kentucky; you other states, from coming in here; but you can not pass a law, according to my understanding to compel a free negro who is here to leave; and to convict him for refusing to do that, is, in my opinion, to couviet him for what is no offence. opinion, to consider the has, it is true, no political rights in Kentneky; and we know that he is excluded by public sentiment from many social rights; but he owes is allegiance, and we owe him the corresponding right of projection. He is bound to obey our laws; he is bound to contribute towards the support of our government according to his property, and we owe him, in return, what is called local protection.

Sir, the Spanish government once put in jail a man of the name of Richard Meade: they had no right to do this, because he had been a long time a resident of Spain, and Spain owed him protection. He had not become a subject of Spain, but she owed him local protection because he would be that gravely a state of the spain. cause he owed to that government, while there, local allegian "; and upon that state of the case being represented to Spain, they released him If you look into the decisions of the supremcourts of the United States, and those of the admiralty of Great Britain, you will find that an American citizen, domiciled in Great Britain when war is declared, is entitled to protection and their vessels than in British ports cannot be captured, because Great Britain owed them local protection; and the same rule applies to British s bjects and British vessels in this country nu-

Now we own to the free negro, local protection tion, and he owes us local allegiance. That allegiance is to submit to our laws, to obey our laws, and to pay taxes according to the property he may po sess. I would submit to this honorable powention that these negroes are poor human beings, and upon the score of humanity. I would ask, would you treat them thus? Present the property of your constant that the property is the property of the second se vent, if you choose, the owner from seiting hi neero free; but every precept of humanity, every law of christianity t rbies that we should treat them wose than we would treat dags. have a right to enjoy their freedom, when free, as we have to enjoy ours. They have no political rights, but they have every civil right that we have; and what is more, their skin will not be black when they go to heaven, and stend be-fore the judgment scat of Christ; there sir, they will be robed as white as we me, and we are to answer for our treatment to them here. I hope my colleage will not press that amendment; it is at wor with every feeling of my heart. They have the same inheritance in the blood of Christ that we have, and we are bound to treat their

Sic, what does the amen Iment propose? That you have right to send them into banishment. r involuntary cryitale for crime. Then sir, f you earry that amendment we have a right to define crime. Now, I deny the policy of that, and I deny the right of it. And you are to sell them out of the state, not as a jonishment to keep them from crime hereafter, but you are to subject them to slavery upon what we, the white, call crime. Sir, I object to this. Put it is said we may transport them. I deny

n'eman says we may send them to some constry which we may acquire. But we cannot a quire any country. If we acquire any country from foreign nations, it is forbid by the constitution of the United States, which provides that the shall enter into any treaty, alliand reprisal, coin money, omit bills of credit, make anything but gold and silver coin a tender in payment of d bts; pass any bill of attainder, ex post jacto law, or law impairing the o'digation of contracts, or grant any title of nobility."

Now sir, no state can make any freaty with any foreign nation. There is no reservation of power. Can we make any ne diations with any lawful prince or king of Arrica to which we may banish negroes and make it a kind of Botany Bay? No sir, we cannot do it at all. This is a matter which congress itself cannot Congress cannot appropriate money for within the power of congress to do it; and that is the reason why the federal government has never taken up the subject. It is provided in the federal countition that "congress shall have power to levy and collect taxes, duties, imposts, and excises," to pay the debts and provide for the common defence and general welfare of the United States, but it has no power to appropriate money for the purposes of colonization at all; and that sir, has been decided over and over again. She can pay dehts and provide for the gen ral welfare of the nation. By the "gener al welfare of the nation" is meant an implied power given to the gen ral government for the purpose of carving the expressed powers into effect. That is the whole of it; and whenever you go beyond that, congress is as annipotent as the British Parliament consisting of king lords and commons.

Bit, sir, congress has no power to apprepriate money to send negroes to Liberia. I again re-peat, I beg, I beserch, I conjure my colleague s this am inducent. He may have power, an I the house may agree with him, but I do think it would be a reproach to this con tion in the eyes of posterity for hundreds of years to come. Suppose, sir, a negro gets drunk you call it a crime, and you sell him into servitude. Suppose he steals a chicken; you call it a crime, and you sell him into servitude for life. Suppose he goes a fishing on the sabbath; you Why, sir, you may make anything a crime if you Let the free negroes take the same laws that we have. If they commit murder let them be hung; if they commit other crimes let them go to jail or the penitentiary. Debar them of any political rights—I am against that; debar of social rights-I am against their intermixing with the white population at all. you have done that, you have done all. have no political rights or power; and when we have the power we are bound to protect them. In the language of Ulysses, when he bowed in

his rags, "A suppliant bends, Oh! pity human woe, 'Tis what the happy to the unhappy owe,"

Mr. TURNER. I would go for striking out the word "misdemeanor" in that resolution, and also part of what the gentleman from Jessamine has gone for—the selling into perpetual servi-Now, sir, it is known that groes for a great many erimes for which a white man is only sent to the penitentiary. I would chose the least of the two evils. If a man comclear of him in this way instead of hanging him.

I cannot, for one, agree to do that which would have a tendency to defeat the objects for which his colony was instituted; and it cannot be questioned, that to send the worst of our black population—men destints of all moral restraint.

Now it is true, that the state of Kentucky has no jurisdiction beyond herlimits; but as there legislature, whether we will continue the resent mode of punishment of free negroes for such offences as burglary and arson, or whether you will not permit the legislature to see what effect.

YEAS—Mr. President, (Guthrie,) Richard Appearance is a colony organized by a sciety in the United States, a man has a right to transfer his negro to that society, and they have power to transport that society, and they have power to transport that society, and they have power to transport it will have another many the legislature to see what effect. that society, and they have power to transport him. The younger gentleman from X tson maintains nothing more than this. The court of appeals has decided that an individual wishing to emancipate his slaves has a right to do so, and the government has power to see that that will is executed, and that the slaves are sent off. If the government has power to do that, certain

ly it has power to avert a greater evil by giving a negro to this society instead of hanging him. The elder gentlemen from Nelson has taken a position which I deny. How does the government of the United States get the power to chase, and man, and sustain vessels to eateh those engaged in the slave trade? Would not the same power which authorizes them to do this, anthe rze them to take away slaves from every state the Union if they were willing to go? This would comport with the good of the whole states if congress would exercise the power, of sending all free negroes to the coast of Africa. How would the government get the power to appropriate half a million of doltars to relieve the distress of Ireland; and yet it passed one branch of congress. Much might be said of this provi-sion it we had time to disense it; but I will ask, sir, what are we to do with free negroes here? do not wish to act unkindly towards them but they are not entitled to the protection of the nstitution against their crimes. I am opposed o their being sold into slavery for a mere eanor, but I am in favor of using the banishing power hy framing laws to suit the state of the ase, and to deliver them over to a society recognized by the federal government. I have no doubt that such a course would be productive of good, and I sincerely hope we shall have some ach provision adopted in the constitution.

Mr BklSTOW. If the legislature have not

already the power to banish free negroes guilty of erime, it occurs to me that we cannot confer that power. I understand that under our gov ernment the legislature have all power where they are not restricted. If we could confer this ower, 1, as one of the delegates to this convenon, would be willing to do so; but it is my in ion that this is a subject which we ought not to interfere with. I am sure if the delegaces his convention ever intend to go home they vill see the propriety of confining themselves to We have been adopting gitinate husiness. isures not unfrequently, and then in a day or two, having seen their impropriety, have rejected them. This does not appear to me to be a mat-ter of that crying importance which renders it cessary to make a provision for it in the cor stitution. I do not think the country demands t; and I would say that my feelings of justice corsponds with those of the elder gentleman from elson. They are, as he has said, a poor degraed race in our country; but they are here, and is our duty to protect them. I would not, herefore, put such a clause into the constitution There is no necessity for it. We would not make a provision in the constitution that a man hould be hanged for any particular crime; this distinctly the province of the legislature. That body has ample power to pass all necessary laws; and therefore, I hold it to be wholly unneces ary for us to make any such provision as this

Solution appears to contemplate.

Mr. C. A. WICKLIFFE. From the remarks at have have been made, it might be supposed hat I was anxious to hang or transport every ree negro in Kentucky, honest or dishonest and that I have attempted to deny free negroes the Hessings of the christian religion. No sir; I mean no such thing. What is the proposition I have offered? I do not propose to create crimo or define if! I leave that with the legislative de artment of this government, acting under the nence of the high obligations which rest up them as men and as christians. They will not deal with the subject of crime in the manne dicated by the opponents of this amendment; they will not declare that fishing on the Sah outh day by any one, hond or free, is an offence for which a mair should be subject to expatriation or hanging, as my colleague apprehend-Our legislatures have not heretofore so legislated; and if we could imagine such a spirit of legiclation to spring up in this commonwealth under the unfinited power of that hody-limit ed only in this respect by a general clause which says that creel punishments shall not be inflicted—they might apply the same wild definition of the word cruel, as applicable to the white man, if unrestricted by this clause in the constitution? Now sir, as to the free negro popula tion, no man has more firmly and uniformly de-Can you send your officers with a human as bore them by the powers of the page of negrous terms and amtornity denounced it, than my colleague, as thievish, dishonest and corrupting. I do not propose to lay violent hands upon them by the powers of the law, and without crime thrust them into prison, the ground as a sense of negrous terms. j risdiction to send a gang of negroes to any place in the United States? No sir. But the commonwealth, and deprive them of institu tions of the state under which they have

quired their freedom and their property. Sir; I propose merely to give to the legislative power of this commonwealth, the power of providing for the punishment of erine, and the constitutional privilege of discriminating be-tween theft or felony committed by the free white man, and the same committed by the free black man. You now punish a free black man under the same law by which you punish a white man; and you do so because he is free. He is hanged for no other offences than these for which you would hang a white man. Not so with the slave.

Now I propose to leave to the legislature the power, under our constitution, of discriminating between the punishments to be inflicted in such cases, and instead of sending a free negro to the pendentiary for a term of years, or for life, to end him into banishment. If the word "misdemeanor" is in the proposition which I have made, I desire it may be stricken out, as it was not my intention to use it.

Mr. President, I had supposed that at this time of day, there was no necessity for a dis-cussion on the high political question that a sovereign state of this union had no power to make treaties, or enter into alliances with any foreign power or state. I had supposed that America rrists understood the difference between a con ract and a treaty and an alliance. The article of the federal constution, read by my colleague denies the power of the state to make a political treaty or affiance. It never has been, and neve could be considered by any jurist, that a state sovereign, either in or out of the commonwealth, in reference to a subject matter of contracts. My friend beforeme, (Mr. Nuttall,) has just suggested that if the construction of my colleague on this section of the constitution is right, we cannot sell a bond to an individual out of this commonwealth. If so how can this commonwealth en-ter into a contract to pay these bonds after she has sold them? How can she transact the vaious business of this commonwealth under our institutions? I will not waste the time of this convention in discussing this matter, because I know there is too much intelligence in this body to believe that the power is denied to a state to make a contract with a foreign nation or power upon a matter which can be the subject matter contract; and it is under that power-under that incidental sovereign power which belongs to any sovereign—that the state of Maryland has had her colony before Liberia was in exist-

Nor do I propose, as the gentleman supposes that we should make a sort of Botany Bay colomy of Liberia. I have not said they should be banished to Liberia, or to any particular spot, or state, or territory; I leave all that within legis-lative discretion, if they should deem it necessary to exercise the power, when the crisis in our history has arrived that shall make it a matter of self-defence to protect our slaves from the cor-rupting influences of free negroes. Is there any thing in this so monstrous as to eall forth so much eloquence, and to bring down even the tears from theeves of my colleague in this house? I propose to banish free negroes for crimes for which your legislature may in mercy hang them. I would send them out of the country, if I could, instead of confining them in penitentiaries for life, or for a term of years. I would

thing the legislature from the exercise of the power he seeks to confer upon them; and if they have all power except wherein they are restricted, and if in this respect they are unrestricted, where the necessity of engrafting upon the constitution such a provision as this? Was not this power used under the laws of England? Was it ever prohibited in Virginia; and when Kentucky was separated from Virginia, was there any provision prohibiting the legislature from punishing crime by transportation? The very name of Botany Bay ought to have recalled to his mind the fact that transportation for crime of the constitution of t his mind the fact that transportation for crime was a noted punishment in England, and the well known fact, that up to the present day, the legislature has never been deprived of that power, should have satisfied him they have it, withnut our conferring it on them have the satisfied him they have it, withnut our conferring it on them have the satisfied him they have it, withnut our conferring it on them have the satisfied him they have it, withnut our conferring it on them have the section was adopted. I am opposed to this proposition, because I regard it as an entering wedge to open an interminable field of discussion. If you go on this way, where will you end? If you give thelegislature power to transport a free negro, why not at the same time give them power to hang a white man? We are here not for the jurpose of excending, but of curtailing their powers—of fixing the barrier beyond which they shall not go, but not to define to them the extent and limits of those powers, within their legitimate sphere of citizens of this or any other state, whether open-

I proposed to put that provision in the constitution for the purpose of compelling the legislature to perform a duty Richard L. ORGANIZATION OF NEW COUNTIES.

THE LEGISLATIVE DEPARTMENT. The convention next proceeded to the consideration of the unfinished report of the committee on the legislative department. The pending section was the sixth, as follows

SEC. 6. Representation shall be equal and uniform in this commonwealth, and shall be forever regulated and ascertained by the number of qualified voters therein. At the first session of the general assembly, after the adoption of this constitution, and every eighth year thereafter provision shall be made by law, that in the year and every eighth year thereafter, an enumeration of all the qualified voters of the state shall be made. The number of representatives shall, in the several years of making these enumerations, be so fixed as not to be less than seventy-five nor more than one hundred; and the shall be apportioned for eight years next follow ing, thus: counties, cities, and towns, havin more than two thirds and less than the full ratio shall have one representative; those having th full ratio and a fraction less than two thirds over shall have but one representative; those having the full ratio and a fraction of more than two thirds over, shall have two representatives, and increase their number in the same proportion; counties having less than two thirds of the ratio, shall be joined to similar adjacent counties for the purpose of sending a representative: Provided, That if there be no such adjacent county, then such county having less than two thirds of the ratio, shall be united to that contiguous county having the smallest number of qualified voter and the remaining representatives, if any, shall

be allotted to those counties, eities, or towns having the largest unrepresented fractions." When last before the convention, this section Mr. Hardin moved to amend, by striking out the words, "number of qualified voters therein," and inserting the following: "the number of free white inhabitants of such county, town, or city, and who shall be citizens of the United States, and residents of the state two years, or of the county, town, or eity, one year next preceding the enumeration, or children born within one year, of mothers who are entitled to be enu

Mr. PRESTON moved to amend the and ment, by striking out all after the words, "the number of fre-white inhabitants of such county town, or eity.

Mr. President, I am willing to take the que tion as it now stands. There are only three ba-ses of representation that I know of. We might have a fourth possibly. I was willing, at first to stand by the old rule of qualified electors, bu me seemed to think it better to have a large basis. I desired to have one of those three hasi acted upon in the United States. The federa basis is property and numbers, including three the federal white hasis. There is a third basis, which is that of the free white citizens of the country. The objection I had to the amendmen of the gentleman from Nelson was, as I stated several days since, that it was of an heteroge-ons character. We all know they have taken white males above twenty-one years of age, from the impossibility of ascertaining what was the qualification of citizenship. Now, if we adopt this plan, a plan I am unwilling to vote for, you invest the censor with unwarranted powers. We know the ceusus taker has difficultive great the constraint of thow the ceusus taker has difficulties enough rithout this. And we all know that many a without this. And we all know that many a censor gets his head broken for being too inquisitive whilst in the performance of his du-

A friend of mine says he once took the census, and had no difficulty. Another gentleman from another county says there is an old lady there who has broken his head three times, on a of the inquiry about the number of her children, for she is unfortunate enough not to have any children; and when asked how many children she has, she turns the question into an assault and battery. We cannot make the census taker a judge of the qualifications of our citizens. The term qualified electors is sufficiently plain. I therefore, shall come down to one of the thre bases. First, if you are willing to go the whole length, let us have free white inhabitants Secondly, if we cannot have that, let us have free white citizens. If, not, let us stay where we are upon the basis of qualified electors. prohably have as much interest as any man i this house in this question, and I wanted a mor extended basis, but so far as the welfare of this constitution is concerned, and its subsequent adoption, I feared we might have great dithenl ty in some of the interior counties. If we think it will give dissatisfaction on account of its taking some strength from them, we had better take the section as the committee have reported it. I want the yeas and navs on "white inhabitants," for by a parity of reasoning alone you cannot say that l'addy and Larry shall not be counted; the men who make your railroads, or labor on the public highways, and who may not be entitled to a vote, are to be counted as well as women and children. There are fourteen states of the Union, whose representative basis is on the federal plan, and the rest are arbitrary Mr. HARDIN. I offered an amendment to

on this subject, because he wished me to draw the attention of the convention to it. That is the way I came to offer the amendment. sure some gentleman was kind enough to say that I had suggested the thing to him. I had no communication with him. He was the first gentleman that suggested it to me, and asked me if I would vote for it, and I said I would I would much rather have the basis as it was proposed by the committee than as my friend from Jefferson (Mr. Meriwether) proposes, that is, the qualified voters, instead of the white population. If the white population is to be the basis, it certainly should be that white population that are called citizens in the estimation of our laws. It is the voting population, if you take the voters as a basis; and if yon take the white population, it should be those who are citizens. The gentleman frum Louisville (Mr. Preston) has always at hand the acts and doings of other states. It is the readiest change in this house.

"THE UNION NOW AND FOREVER." At no period in our history, more eminently than at the present, have the friends of the constitution been called upon to stand by this noble declaration of the great civilian of the north. The nation has been convulsed to its centre at To The convention has very nearly concluded three memorable periods:—that of the war of ous statesman of the west, saved the Union by a compromise, in which the conservative principles of the constitution were maintained and vindicated; and his patriotic voice contributed to the declaration, vigorous prosecution, and glorious termination of the struggle, which tested the ample capacity of the national compact for any emergency. But as the veteran editor of the "Union" has announced for the fiftieth time, we are now in the midst of a crisis in which we regret to think more deeply scated prejudices, and more unworthy passions have sway, than in any of the previous convulsions of our beloved country. It gives us pain to add our conviction that our public men of the present day are less under the influence of a high-minded, disinterested patriotism than in former periods of the Re-Our old friend, Col. The Patriot contains an outline of his remarks that occasion. We copy the following:

"He alluded to the question of slavery, in connection with the recently acquired territories of California and New Mexico. On the one hand it was urged that a congressional enactment was indispensable to prevent the institution of slavery from taking root in these new territoriss while another party contended as earnestly that such an act would be unconstitutional, because would deprive them of their right to take their slaves there. He deprecated the agitation of this subject. There appeared to him to be no substantial foundation for the fear that the institution of slavery would ever exist in these territories, and especially in California. The charof the country, its population, the indus trial pursuits of that population, every thing connected with that country, seemed to him to forbid the idea that slavery would be introduced there; but the agitation, in connection with the subject, seemed to have assumed a grave aspect, and there are some who went so far as to taik of disunion—a disunion of the states of this glori-ous confederacy—the thought to his mind was upon a nation-no evils of which the imaginadesperate—a remedy bringing in its sad train such a host of calamities and ruinous results. Whatever else he might or might not do in his place in the Senate, he would pledge himself that there was one position which he would oc-cupy; that of bold and carnest defence of the sacred interests involved in the preservation of the Union of the states! [At this point Mr. Clay drew nimself up to his full height, and enunciated this sentiment with the full volume of his magnificent voice, thereby giving to it an emphasis that made every heart thrill, and it was responded to by cheer after cheer of tumult

Clay then said that he had spoken more fully upon this point, perhaps, than he should have done upon such an occasion, but the sub-ject was one of so grave a character that he had been able to avoid an allusion to it, espe eially as it was one of the points referred to, in the letter of invitation which he had received.

We digest a few of its important features:

ARTICLE XII.—Boundary.

The boundary of the state of California, shall be as follows:

Commencing at the point of intersection of the 421 degrees of north latitude with the 190th degree of longitude west from Greenwich, and running south on the line of said 120th degree of ngitude, until it intersects the 39th degree of north latitude, thence running in a straight line in a south-easterly direction to the River Colorado, at a point where it intersects the 35th degree the President of its choice a fair hearing. It is the bill, which it says Schator roote will intro-duce the very first day after the organization of channel of said river, to the boundary line be-extra size and of a pure breed 6e was offered. , as estabtween the United States and Mexico lished by the Treaty of May 30th, 1845; thence running west and along said boundary line to direction, and following the direction of Pacific Coast to the 42d degree of north latitude, thence on the line of the 42d degree of north latitude to the place of heginning. all the islands, harbors and bays, along and adiacent to the Pacific coast.

The above boundaries leave out the Mormon State of Desert, and includes all the Sea Coast. It will make a most gigantic State. ARTICLE 11 .- Right of Suffrage.

Src. 1. Every white male citizen of the United States, and every white male citizen of Mexico, who shall have elected to become a citizen of the United States, under the treaty of peace exchanged and ratified at Queretaro, on the 30th day of May, 1848, of the age of 21 years, who shall have been a resident of the state six months shall be entitled to vote at all elections which are now, or hereafter may be, authorized by law: Provided, That nothing herein contained, shall be construed to prevent the legislature, by a twothirds concurrent vote, from admitting to the 51ge. right of suffrage, Indians, or the descendants of Indians, in such special cases as such a portion of the legislative body may deem just and prop-

ment of crimes shall ever be tolerated in this

Security of Wife's Property.—California @ \$5. has secured the wife's property by the follow-

ing provision:— §14. All property, both real and personal, of the wife, owned or claimed by her before marri age, and that acquired afterwards by gift, de vise or descent, shall be her separate property and laws shall be passed more clearly the rights of the wife, in relation as well to he separate property, as that held in common with her husband. Laws shall also be proved by ding for the registration of the wife's separate

Property.

Homestead Exemption.—§ 15. The Legislature shall protect by law, from forced sale, a certain portion of the homestead and other proper-§ 16. No perpetuities shall be allowed, except

for eleemosynary purposes.

Taxation Equal.—§ 18. Taxation shall be equal and uniform throughout the state. All property in this state, shall be taxed in proportion to its value, to be ascertained as directed by law; but assessors and collectors of town, county, and state taxes, shall be elected by the qualified electors of the district, county or to in which the property taxed for state, county or town purposes is situated.

MARRIAGE CONTRACT.—§ 12. No contract of marriage, if otherwise duly made, shall be invalidated, for want of conformity to the requireents of any religious seet.

The meaning of this will be understood, when we state, that the laws of Mexico, previously in force, made marriage a Religious sacriment. The laws of the United States, however, make it a civil contract. This provision in the California constitution makes it also a civil contract We repeat, that the new California Constitu-tion is about the best specimen of Constitution making we have seen. We like it very well.

OF THE KENTUCKY SATE CONVENTION.—Mr. Guthrie, the President of the convention, is a man of decided talents—of great energy of character dignified in his deportment—rather unyielding in his disposition—having extensive experience in legislation—devoted to the interests of the of Louisville, which has frequently honored him by sending him to represent her interests to each branch of the legislature. As the political majority against him is several hundred, he must be able, honest, and trusty, or he could not have been so frequently honored by a con-

stiluency differing politically with him. Mr. Williams, of Bourbon, is a gentleman of ound judgment-much experience in public business—straight forward in whatever he has to do, and, of course, does nothing by indirection. He is sound and consistent in his course, unobtrusive in his manners, and has fine common sense. He and his colleague, Mr. Davis sit together, but sometimes separate in their votes. The county of Bourbon is ably and nobly represented in the covention .- Mt. Sterling

JOHN BULL'S Fluid Extract of Sarsaparilla.

Tills invaluable remedy has already caused happiness to the hearts of thousands and ness to the hearts of thousands, and is daily giving more consolation to the afflicted than could be afforded by all the wealth in the mines of California and the world combined.

It is put up in full Quart Bottles, and contains the strength of SIX TIMES as much Pure Honduras Sarsaparilla as any similar preparation made in America.—

Price \$1 per Bottle, or six Bottles for \$5.

It has been a well established fact for years past, that Sarsaparille, when pure and properly prepared, was the only true panacea for all diseases originating from an impure state of the blood, the use of mercury, intoxica ing drinks, evil habits in youth, harrenness, &c. We oldly assert that John Bull's Fluid Extract of Sarsuparilla is the only preparation before the public that is prepared on strictly scientilic principles, and of uniform strength. The Sarsaparilla is purchased without any regard to price, and every pound, before being used, is subjected to the strictest chemical tests, and its enulineness secretained before being used.
BULL'S SARSAPARILLA also contains the virtues

What Dr. Owen, Druggist and Apothecary of several years' standing, says about Bull's Sarsaparilla:

LOUISVILLE, May 21, 1848.

Mr. John Bell-Dear Sir: I have been for a number of years severely afflicted with a Mercinial Headache, and a dull, heavy pain in my Liver. I used almost all the remedies of the day, especially the Sarsaparilla pre pared by different persons. But all to little or no advantage, until I chanced to meet with yours, three bot tles of which gave me more relief than all the others combined.

I therefore take pleasure in recommending your Sarsaparilla to the afflicted community as a superior arti-cle. Very respectfully, J. H. OWEN, M. D.

RHEUMATISM.

Let all those who are suffering under the agonizing tortures of Rheumatism, read the following, and see what may also be done for them, if they will use this infallible remedy.

Mr. John Bull-Dear Sir: For the last three years, I

Mr. John Rell—Dear Sir: For the last three years, I have been afflicted with Rheumatism of the severest character. I was at times in the greatest agony of pain; I tried every remedy I could procure for the disease, but found no permanent relief until I was induced to use your preparation of Sarsaparilla, which has entirely cured me of Rheumatism, and greatly improved my generial health more than any medicine I have ever used. I have been Iree of pain for several months, and have no doubt the cure is permanent, and I conhibently recommend it as being the best medicine in use for Rheumatism.

A BEAUTIFUL CLEAR SKIN.

To secure the manifold advantage of health, economy, discipline, progress and moral training, the Faculty of this Institution, have selected for its permanent location, the famous

Blue Lick Springs

Situated on the Lexington and Maysville Turnpike, 24 miles from the latter place, and 40 from the former; emphatically a country location, being ten or twelve miles distant from any town or village. The brildings are mostly new, well constructed for Garrison purposes, and ample for the accommodation of three hundred Cadets.

This place is unsurpassed for its healthy atmosphere, pure water, and romantic scenery; and is unquestionably one of the most eligible locations for a Literary Institution in the United States. The grounds have been greatly improved and ornamented during the last five years. A plat of forty acres, beautifully situated on the margin of the Licking River, immediately in the rear of the buildings, will be reserved for Military Exercises.

FROM DR. JAMES M. MOORE. Mr. John Bell: I have no hesitation in saying that I helieve your Sarsaparilla to be the best article ever manufactured for the cure of Scrolula, Syphillis, and many other cutaneous and Glandular Affections, having used it with entire success in a number of the above cases.

Louisville, Dec. 26, 1847.

JAS. M. MOORE.

More testimony from Pr. Moore:
Mr. John Bull: 1 am using your Sarsaparilla in several new cases of Scrofula, and with happy effect. 1 am now confident it is one of the most ellicacious medicines that can be made for that disease. Yours,

What Br. Pyles, Physician by appointment to the Louisville Marine Hospital, says of Bull's Saisaparilla: Loursville, March 20, 1842.

I have examined the prescription for the preparation of John Bull's Sarsaparilla, and believe the combination to be an excellent one, and well calnated to produce an alterative impression on the system. I have used it both in public and private practice, and think it the best article of Sarsaparilla in use.
